Featuring:

William Tsang, PsyD, is a staff psychologist specializing in neuropsychology and rehabilitation psychology at NYU Langone Health Rusk Rehabilitation.

Dr. Tsang is a provider for the NYULH Post-COVID Care Program. He assesses cognitive and psychological factors associated with Long COVID and associated conditions. Applying knowledge of brain-behavior relationships as well as evidence-based therapies, Dr. Tsang provides individuals with tools to manage their symptoms and to improve quality of life.

ABOUT THE TALK:

Long COVID is a challenging and rapidly evolving area in rehabilitation psychology. This presentation offers evidence-based approaches in addressing the cognitive, behavioral, and psychological sequelae of COVID-19 infection. In addition to research literature and clinical experiences from an outpatient rehabilitation service, participants are also encouraged to share personal experiences.

SPEAKER SERIES OF THE HOSPITAL, HEALTH & ADDICTION WORKERS, PATIENTS AND FAMILIES WORK GROUP OF THE INTERDIVISIONAL TASK FORCE ON THE PANDEMIC AMERICAN PSYCHOLOGICAL ASSOCIATION

SPONSORS: PSYCHOANALYSIS & HEALTHCARE COMMITTEE
