Featuring:

Aaron Weiner, PhD, ABPP, is a licensed psychologist and board-certified addiction specialist. Dr. Weiner speaks nationally on the topics of addiction and behavioral health, and the impact of drug policy on public health. His perspective is informed by his years of experience growing and directing addiction service lines for hospitals and healthcare systems, the current state of medical and psychological research, and his own observations in private practice.

Dr. Weiner is the immediate Past President of the Society of Addiction Psychology, and his opinions have been featured in numerous outlets including Newsweek, USA Today, The Chicago Tribune, The Guardian, and The New York Times. He is currently on the Public Policy Committee for the American Society of Addiction Medicine and a member of the Science Advisory Board for the Foundation for Drug Policy Solutions.

Find more information about Dr. Weiner's work at www.weinerphd.com

ABOUT THE TALK:

Opioid overdoses dramatically spiked during the COVID years but have tragically continued to rise as the country has pivoted to a post-COVID reality. Join Dr. Aaron Weiner and the COVID Psychology Task Force to discuss current trends related to opioid overdose in 2024 (including fentanyl, xylazine, and nitazenes), and how professionals can work to finally turn the tide in the epidemic of addiction that has continued to persist as the viral pandemic wanes.

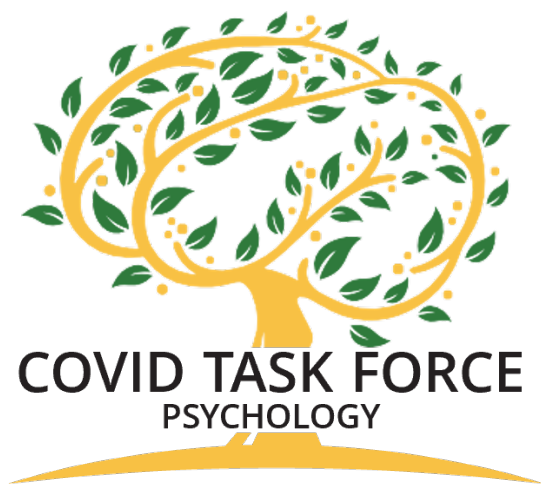

Click here to watch our interview with Dr. Weiner.

This talk will be recorded

SPONSOR: Psychoanalysis & Healthcare Committee, Div. 39 Psychoanalysis, American Psychological Association
